

*"We protect a site within a matter of minutes as no power & no wired communications are required."*

**Robowatch**

# Reconeyez for solar farms

Solar farms are the fastest-growing use case for Reconeyez systems. Thousands of security companies in over 60 countries count on Reconeyez for reliable and profitable solar farm security.

## **Deploy amongst existing structures**

Leverage mesh capabilities and wireless design to deploy and redeploy devices in as little as 2 minutes without disrupting existing structures. Reconeyez devices have multiple easy mounting options and require no advanced technical skills to deploy.

## **Cover areas without connections**

No more trenches to dig, cables to lay, or power to source—the Reconeyez system requires no Wi-Fi or power. The devices are battery-powered with optional solar charging and communicate with the Cloud via the mobile network.

## **Reduce maintenance visits**

Leverage remote site management and exceptional battery life of up to 400 days to reduce site visits. Our devices are reliable and durable in demanding environments—resistant to water and extreme temperatures.

## **Eliminate false call-outs**

Leverage HD-quality alarm images and AI object detection to eliminate false call-outs and decrease reaction times. Reduce false alarms by 95% and receive AI-verified alarm images in 10 seconds.

# About Reconeyez

Reconeyez is a wireless intrusion detection system with visual verification. Secure complex outdoor sites at a low total ownership cost: simplify installation and management, minimise site visits, and eliminate false call-outs.

Up to 400-day battery life

Optional solar charging

95% false alarm reduction

35m detection distance

HD-quality images

IP67-rated
