

"We have found that the system was versatile and could be adapted to fit any scenario and get to places that would otherwise be excluded from the security due to inaccessibility."

BCM Security

Reconeyez for construction sites

Construction sites are the most common use case for Reconeyez systems. Thousands of security companies in over 60 countries count on Reconeyez for reliable and profitable construction security.

Meet rapidly changing security needs

Change the site layout in minutes. Reconeyez devices have multiple easy mounting options and require no advanced technical skills to deploy. Leverage mesh capabilities and wireless design to deploy and redeploy devices in as little as 2 minutes.

Simplify site management

Manage schedules, change settings, and activate access codes from the Cloud. Arm and disarm the site via the App or keypad. Integrate alarms, sirens, and device statuses straight into your existing monitoring system.

Reduce maintenance visits

Leverage remote site management and exceptional battery life of up to 400 days to reduce site visits. Our devices are reliable and durable in demanding environments—resistant to water, extreme temperatures, dust, and vibrations.

Eliminate false call-outs

Leverage HD-quality alarm images and AI object detection to eliminate false call-outs and decrease reaction times. Reduce false alarms by 95% and receive AI-verified alarm images in 10 seconds.

About Reconeyez

Reconeyez is a wireless intrusion detection system with visual verification. Secure complex outdoor sites at a low total ownership cost: simplify installation and management, minimise site visits, and eliminate false call-outs.

Up to 400-day battery life

Optional solar charging

95% false alarm reduction

35m detection distance

HD-quality images

IP67-rated
