

PRODUCT GUIDE

Reconeyez Cloud service

About Reconeyez Cloud

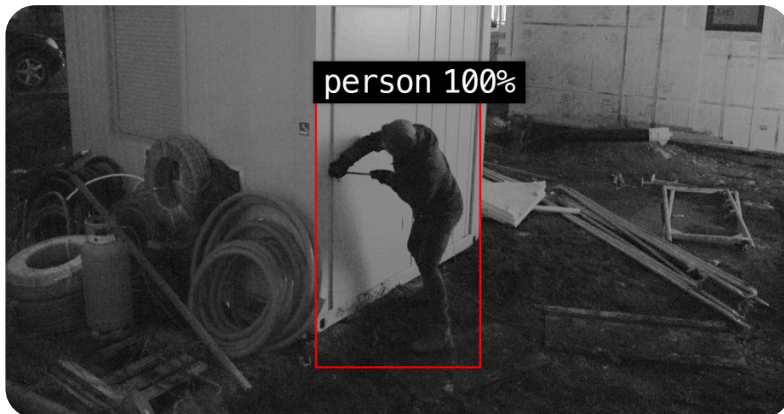

Reconeyez Cloud is hosted on dedicated machines by reputable providers within the EU and the US. All data is encrypted at all times.

Reconeyez Cloud has two main functions: AI object detection and remote management.

AI object detection

Reconeyez AI model analyses 2M alarm photos a day and eliminates false alarms with 95% accuracy.

- | AI object detection for people, vehicles, and animals
- | Stationary object detection eliminates false alarms from parked cars, etc.
- | AI-verified alarm received in 10 seconds
- | The proprietary AI algorithm adjusts PIR sensitivity

Remote management

Alarm management

- Monitor alarms from Reconeyez Cloud or through monitoring station integrations
- Request instant snapshot images for additional information
- Receive AI-verified alarm in 10 seconds
- Get an alarm feed overview from all selected areas

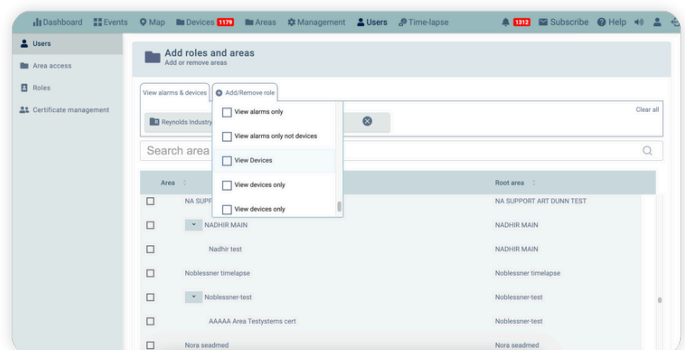

Supported monitoring station integrations

User Management

- Assign flexible user permissions by area and role
- Utilise preconfigured access roles

Site management

- | Change site and device settings
- | Review site and device analytics
- | Arm and disarm sites
- | Get reports on all devices
- | Utilise pre-set configurations suitable for most sites

More configuration options than any competitor

- | Change the resolution for alarm images
- | Choose the alarm area in the pictures
- | Set complex arming and disarming schedules, including custom schedules for events or holidays
- | Adjust the tamper sensitivity
- | Set a custom number of photos per activation
- | Modify the time between alarm photos

Receive notifications for

- | Battery level less than specified %
- | Large number of alarm images sent
- | Connection lost
- | Device armed/disarmed
- | User added/deleted
- | Device schedule/timezone changed

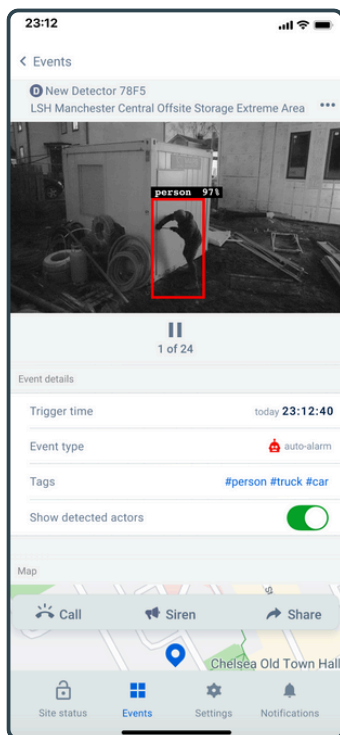

Time-lapse

Utilise Reconeyez detectors for time-lapse videos.

- | HD quality images
- | Customisable duration between captures (up to two pictures per hour, day or night)
- | Sharable link to the time-lapse video (new frames are added continuously)
- | Adjustable replay speed (x0.25, x1, x3)
- | Downloadable Mp4 video
- | Simple set-up via Cloud

Mobile app

Manage Reconeyez sites on the go and give limited access to end-users

- | Arm/disarm the site
- | Access alarm images
- | Receive alarm and device notifications
